

Group	Proposed logos	Comment
Group0		<p>Initial proposal: The draft logo is based on the meaning "chord" (accord or close word mean "chord" in many of the languages used in the 26 ACCORD countries). The 5 lines of the musical staff have been converted into waves. Following the proposal by LTMs during the LTM kick-off meeting, the clef and the notes have been replaced by some SYNOP weather symbols. The O was replaced by the SYNOP symbol "calm wind". Altogether, the logo pictures ACCORD navigating in calm winds and riding the waves ... a way to wish "<i>Fair winds and following seas</i>" to <i>ACCORD</i>".</p>
		<p>Simplified version after Assembly demand to simplify: all SYNOP symbols removed besides the O (calm winds)</p>
		<p>Version without transparent background: simple (mono-color) background could be added (example with grey)</p>
		<p>kept the wave and synop wind, redesigned</p>

We made a circle with 5 musical lines as it represents unity, commitment and community. Circle has no beginning or end, it represents life and the cycle of life. We converted two of the lines to cold and warm fronts because every co-operation has it's ups and downs and new possibilities that come of it. We also very much liked the idea of music lines. These 26 countries are like musicians in a symphony orchestra. We practice and rehearse together and the outcome to our clients is like music to their ears.
