

DDH actions

- **Add dynamics terms (SL, SI, spec. Hor. Diff.):**
 - Write a proposal to be distributed to ALARO partners
 - Code (~ 6 months, F. Voitus + partner ?)
- **New dataflow:**
 - For Arome (O. Rivière): CY35T1 (November 08) => to be extensively tested
 - For Arpège/Aladin/Alaro (O. Rivière) : CY35T2 in parallel to old dataflow (used by ECMWF !) => to be then tested widely within the community
 - Documentation in English (O.R., Nov. 08)
 - Remove old dataflow from code: contact with ECMWF needed; not before CY37 (supervision: O.R)
 - Modernization of DDH operator with respect to new dataflow (supervision: O.R)
- **Strategy for intercomparison of model versions: no action planned before the outcome of the MAPFI treatment (to avoid duplication of work)**
