- **Subject**: [alabobo2] new incremental update of the Aladin export version based on CY43T2: bf.11
- **Date**: Thu, 25 Jun 2020 16:32:40 +0200 (CEST)

Dear colleagues,

in close coordination with the team at SHMU and LACE ASCS, we have been defining an incremental update of the ALADIN export version
based on CY43T2. The GIT label of this update is CY43T2_bf.11.

The export consists of the changed source code files complemented by a technical description of the code changes.
Please read the tech doc carefully. The file "FINAL LIST BF11_v02" contains the technical description of the update branch.
The file "cy32t2_bf_v11" contains the location of the tar-ball and executables preapred by GCO.

Special thanks go to Olda Spaniel, who has been preparing the GIT branch and ran the mitraillette test suite for this code.

Cordialement,
Claude F. on behalf of all involved colleagues.
tass
