  - **Date:** Fri, 22 Apr 2016 13:30:43 +0200
- 

Dear alabobos,

just to let you know that for some of us that were porting assimilation configurations for CY40T1.bf05\_export it was not obvious that a correct version of create\_ioassign script - that corresponds to CY40T1 - shall be used. It is important namely for having correct ODB tables for satellite obs.

The script was included in the tar file of CY40T1.bf05\_export, namely scripts/gen/create\_ioassign

Kind regards  
Mariska
