

*ALADIN achievements:
operational aspects*

ALADIN GA, Brussels, 23rd February 2006

ALADIN is operational

ALADIN is operational

- At all the members'
 - newcomers: after a few years work
 - with interim solution in Toulouse if needed
 - next to come: Algeria
- basic goal of such a co-operation

ALADIN is operational

- A large variety of applications
 - from NORAFA to local high res adaptation
 - classical forecasting applications
 - with or without data assimilation
 - high res dynamical adaptation
 - diagnostic analyses

Still to be done

- Better mastering of the diversity
 - complementarity or redundancy ?
- Consolidation of the operational nature
 - verification
 - telecoms
 - procedures (version change eg.)
 - etc.
- Towards more expensive and complex applications
 - esp. in the AROME framework
