- **Date:** Tue, 9 Apr 2019 15:44:23 +0200 (CEST)

---

Dear all,

This is a small update of the auxlibs installation package, because the dummy library fdbdummy needs the following new symbol in cycle 47 :  
imultio\_notify\_step\_

There is also the support for Mac OSX on Haswell.

The tar file can be found on ecfs and hendrix :  
ec:/perm/ms/fr/rme/install/auxlibs\_installer.3.3.tgz  
hendrix:/home/khatib/install/auxlibs\_installer.3.3.tgz

The fdbdummy library has been updated in my account on beaufix/prolix, hirald at ECMWF, and on the PC of GMAP.

Best regards,  
Ryad
