

AMERICAN METEOROLOGICAL SOCIETY

Journal of Hydrometeorology

EARLY ONLINE RELEASE

This is a preliminary PDF of the author-produced manuscript that has been peer-reviewed and accepted for publication. Since it is being posted so soon after acceptance, it has not yet been copyedited, formatted, or processed by AMS Publications. This preliminary version of the manuscript may be downloaded, distributed, and cited, but please be aware that there will be visual differences and possibly some content differences between this version and the final published version.

The DOI for this manuscript is doi: [10.1175/2010JHM1272.1](https://doi.org/10.1175/2010JHM1272.1)

The final published version of this manuscript will replace the preliminary version at the above DOI once it is available.

**Understanding the daily cycle of evapotranspiration: a method to
quantify the influence of forcings and feedbacks**
