7e LAM Climate

GA: discuss and decide:

- The debate inside the community is whether the rationalisation that this implies should be driven by:
 - either the availability of the first ALADIN-Climate versions and the well-understood ‘expert ↔ educated users’ methodology of cooperation present in the NWP applications for now more than fifteen years;
 - or a user-oriented ‘fresh thrust’ aimed at profiling ALADIN-Climate as a specific LAM-Climate entity (with the additional user-support actions that this supposes), in the hope to trigger a wide ranging positive feed-back.

The issue is not urgent but the time is ripe to open the debate
